## 1. Product Information

### **RG35XXSP Flip Portable Retro Handheld Game Console, RG35XXSP 3.5 Inch IPS Screen Linux System with 64G TF Card Pre-Installed 5532 Games, Clamshell Games Consoles Supports 5G WiFi Bluetooth HDMI xxsp**

【RG35XXSP Flip Portable Flip Retro Handheld Game】RG35XXSP Flip adopts the flip cover design, the upper and lower cover built-in powerful magnets, support the magnetic suction function of the closed cover, the use of high-quality alloy shaft, can be hovered at any angle, to provide 190 degrees and 155 degrees of the two preset angles, easy to auto-lock; Built-in Hall switch chip, support the open cover bright screen, the box cover rest screen function.

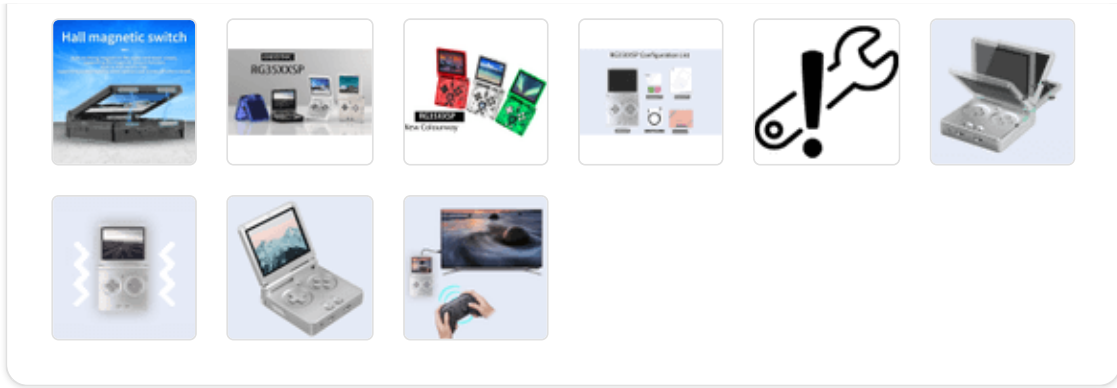

【RG35XXSP Flip Handheld Game Console Built in 5532 Games】RG 35XXSP portable flip handheld game console supports more than 30 game formats . RG35XXSP Flip With 64GB TF card, built-in 5532 classic games, Supports: ported games, various other game formats. supports users to download games in related formats themselves. supports Dual card slots, support TF card expansion, maximum 512GB.

【3300 mAh Li-polymer battery and 3.5 INCHES OCA IPS screen】you can use RG35XXSP Flip for 7-8 hours, support fast charging with USB Type-C cable, 35XXSP With 3.5-inch IPS full viewing angle, zero distance OCA full-fit screen, the screen resolution is 640\*480, Sharper picture quality and more saturated colours.

【Multifunctional RG35XXSP Flip Game Console】RG35XXSP Flip Built-in 2.4/5G WIFI 802.11a/b/g/n/ac , Supports 2.4G wireless controller and wired controller connection, Bluetooth controller connection, H-D-M-I connection to TV, vibration motor, online multiplayer via WiFi, and streaming other functions. Supports video player , file manager, and e-book reader (supports txt format).

【 Good icial】Dimensions of RG35XXSP Flip Handled game :8.9cm\*8.5cm \*2.7cm, RG 35XX is a good size in the hand and is suitable for carrying around is a great gift for boyfriend, girlfriend, husband, brother, son, daughter, father, mother and friends for birthday, Father's Day, Christmas, Valentines Day, Thanksgiving Day etc. Get lots of compliments on how it's interesting or practical.

FLATFEE

## 2. Executive Summary

---

Intellectual Property (“IP”) consists of trademarks (including trade dress), copyrights, patents (both utility and design), and trade secrets. Trade secrets and utility patents are beyond the scope of this report and are not usually relevant to ecommerce sales. Other related concepts are rights of publicity and defamation, which are also beyond the scope of this report and rarely relevant to ecommerce sales. You should review the appendix for brief summaries of the topics not covered in this report. If you have any concerns, you may contact the attorney who signed this report.

This report focuses on the intellectual property areas of greatest concern in ecommerce sales: trademarks, copyright and design patents.

### **Likelihood of Confusion Standard on Trademark**

The standard for determining whether a product, trademark or advertisement (including ecommerce store description and keywords) infringes on a trademark is “Likelihood of Confusion”, that is whether the product, trademark or advertisement is confusingly similar to an existing trademark. Determination of likelihood of confusion revolves around two factors: similarity in appearance, sound, connotation, or the overall commercial impression, and similarity in the goods or services for sale. Generally, a subsequent user cannot simply make minor changes to an existing mark. For example, one could not simply change one letter in McDonalds to MacDonalnds to avoid likelihood of confusion Likewise, the goods or services need not be identical or directly competitive to find a likelihood of confusion, but need only be related or marketed such that they give rise to the mistaken belief that the goods and services come from a common source.

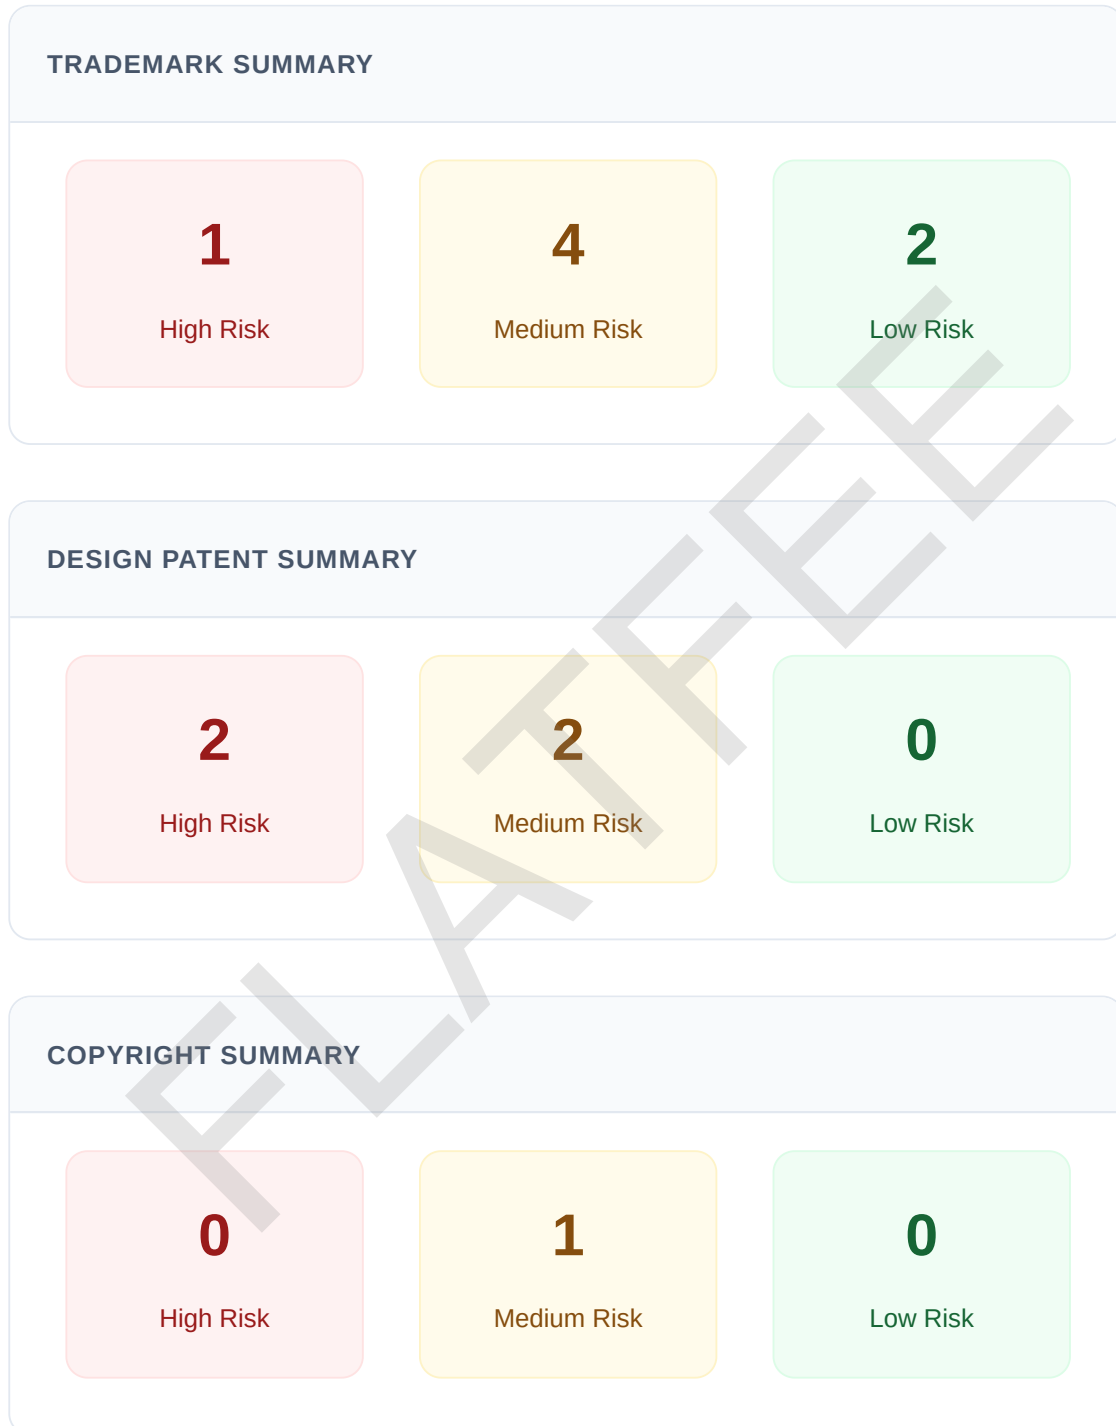

### **Substantially Similar Standard on Design Patent**

The “ordinary observer” test for design patent infringement involves a visual comparison between the product in question and the patented design The ordinary observer test asks whether a product design would appear substantially similar to a patented design to an average person with no specialized knowledge.

### **Substantial Similar Standard on Copyright**

All that is necessary is that the copying be substantial and material and that protected expression – not just ideas – were copied. Likewise, the similarity between the two works must be similarity of protected elements (the expression), not unprotected elements (the facts, ideas, etc.).

## Risk Analysis Summary

Risk Item	Infringement Type	Description	Risk Level
RG35XXSP	Trademark	No relevant trademarks were found in the US for the model name 'RG35XXSP'. While common law trademarks may exist, the risk of infringement is low due to the lack of registered trademarks and the specificity of the model name in the context of handheld game consoles.	High
Clamshell Games Consoles	Trademark	The term 'Clamshell Games Consoles' does not appear to be directly associated with any existing trademarks in the provided sample. The trademarks related to 'Clamshell' are in different classes and pertain to different products or services, such as electronic components, transaction printers, and other unrelated items. Therefore, the risk of trademark infringement for using 'Clamshell Games Consoles' in the context of a game console design is low.	Low
File manager icon	Design Patent	The design of the file manager icon may potentially overlap with existing design patents related to graphical user interfaces for document management systems. While the icon's uniqueness and distinctiveness are key factors, the presence of similar patented designs increases the risk of infringement.	Medium
File manager icon	Trademark	No relevant trademarks were found in the US for the file manager icon. While common law trademarks may exist, the risk is low due to the generic nature of file manager icons and the lack of distinctive branding associated with this specific icon.	Low
3.5-inch IPS full viewing angle	Trademark	The term 'IPS' is commonly associated with a specific type of display technology, which may be trademarked. While 'IPS' is a technical term, its use in the context of display	Medium

Risk Item	Infringement Type	Description	Risk Level
		<p>technology could potentially infringe on existing trademarks if it is registered as a trademark by a company in the relevant class. The risk is medium due to the possibility of trademark claims, although 'IPS' is widely used in the industry.</p>	
OCA full lamination	Trademark	<p>The term 'OCA' in the context of screen lamination technology could potentially be associated with a specific trademark if it is used to denote a proprietary technology or brand. While 'OCA' is a common abbreviation for 'Optically Clear Adhesive,' its use in a commercial product description without proper verification of trademark status could lead to potential infringement issues if it is trademarked in this context.</p>	Medium
Device design	Design Patent	<p>The design of the device, including its shape and features, closely resembles existing designs that are protected by design patents for foldable and dual-screen electronic devices. This similarity increases the likelihood of potential infringement issues.</p>	High
multimedia applications	Trademark	<p>The phrase 'multimedia applications' is a generic term commonly used in the tech industry to describe software that handles various media types. However, there are existing trademarks that incorporate 'multimedia' in their titles, which could potentially lead to confusion if the term is used in a branded context. The risk is moderate due to the generic nature of the term, but caution is advised to ensure it is not used in a way that implies a specific brand association.</p>	Medium
Music note graphic	Design Patent	<p>The music note graphic displayed on the device could potentially infringe on existing</p>	Medium

Risk Item	Infringement Type	Description	Risk Level
		design patents if it is deemed unique and non-obvious. While the graphic itself is a common symbol, its specific design and presentation may be protected under a design patent, increasing the risk of infringement.	
Music note graphic	Copyright	The music note graphic on the device screen may be subject to copyright if it is an original artistic work. The presence of similar graphics available for purchase or download on platforms like Etsy and Adobe Stock suggests that such designs can be protected by copyright. However, the widespread availability of similar graphics also indicates that the design might be generic, which could lower the risk. Therefore, the risk level is assessed as Medium.	Medium
Game Controller	Design Patent	The design of the game controller closely resembles existing designs that are likely protected by design patents, increasing the risk of infringement.	High
Game Controller	Trademark	The design of the game controller may pose a trademark infringement risk if it closely resembles a distinctive design associated with a specific brand. The risk is elevated if the controller's design is similar to well-known controllers in the market, which could lead to consumer confusion regarding the source or brand of the product.	Medium

## Disclaimer

This report is intended solely for informational purposes and doesn't constitute a legal advice or opinion. Please note that this analysis does not address trademarks protected under common law, as these are not registered and may require separate evaluation. We do not search state trademark registration database either.

Additionally, all usage of photos, narratives, and other original content should comply with copyright laws, as copyright protection applies automatically upon creation, without the need for formal registration. For specific legal guidance or further analysis, please consult your attorney (additional fee will apply).

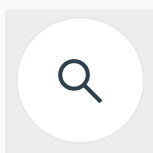

The scope of analysis is limited to the product information displayed after the cover letter. Also, we assume that you are the owner of certain IP registrations as listed in Exhibit A attached here (with some named competitor's IP registrations listed therein as well). Our AI analysis is based on those assumptions such as the search is exhaustive and the list of IP registrations are accurate and complete, which may or may not be the case.

## 4. Risk Items

### 4.1. RG35XXSP

#### 4.1.1. Trademark

High Risk

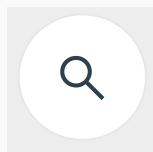

[Request Expert Review](#)

The model name 'RG35XXSP' could potentially be a trademark if it is registered as such.

#### Risk Assessment

No relevant trademarks were found in the US for the model name 'RG35XXSP'. While common law trademarks may exist, the risk of infringement is low due to the lack of registered trademarks and the specificity of the model name in the context of handheld game consoles.

#### Trademark Matches

No Matches Found

## 4.2. Clamshell Games Consoles

### 4.2.1. Trademark

Low Risk

[Register Trademark Now](#)

The term 'Clamshell Games Consoles' could potentially be a trademark if it is registered as such.

#### Risk Assessment

The term 'Clamshell Games Consoles' does not appear to be directly associated with any existing trademarks in the provided sample. The trademarks related to 'Clamshell' are in different classes and pertain to different products or services, such as electronic components, transaction printers, and other unrelated items. Therefore, the risk of trademark infringement for using 'Clamshell Games Consoles' in the context of a game console design is low.
